Subject: oil field co-operation

Shalom,

A large international mining and oil group owned by the Engel Group, holds a license of oil exploration in the Senegal off-shore area (see plz the attached summary).

The license is about 8000 square kilometers. Lately, the Cairns Corporation and Conoco-Philips have drilled two wells in an adjacent bloc, 3500 meters deep. Their estimate comes to about 1.5 billion barrels of high-grade (light) oil.

The Engel group is looking for a partner (minority or majority) based on a valuation of about USD 80 million for the bloc, in order to conduct a 3-D seismic operation to pinpoint possible drilling targets.
If your partners they like the idea, Engel has opened a data room and will supply all technical info for an NDA.

We were promised a significant fee. Could you help us find a possible partner? Maybe one of the groups you were meeting at your recent visit East?

Regards,

ODED SHORER
